

Position Available
Petrophysicist
Dallas, TX

JOB DESCRIPTION:

A Petrophysicist to design data acquisition programs, support logging operations and perform integrated reservoir studies for the purpose of evaluating oil and gas prospects and acquisition opportunities as part of a multi-disciplinary team.

JOB REQUIREMENTS:

The successful candidate will play a leading role in an aggressive acquisition, exploration and development program designed to rapidly increase the reserve base. The qualifications include:

- Minimum 3 yrs. experience as a petrophysicist or open-hole wireline logging engineer.
- BS Engineering, Geology or Geophysics, but MS degree preferred.
- Permian basin experience a plus.
- Integration/calibration of core and wireline log data to build advanced petrophysical models in order to provide volumetric calculations, lithology, and mechanical rock properties.
- Familiar with calibrating open hole logs with seismic data.
- Ability to integrate logs to core, production data, and reservoir data.
- Experience with unconventional reservoir petrophysics for analysis of shale reservoirs, tight sands and fractured reservoirs.
- Experience with conventional reservoir analysis a plus.
- Advanced knowledge of petrophysical software packages.
- Outstanding interpersonal skills with the ability and desire to work within a multi-disciplinary team, as well as with other technical and financial groups.
- Excellent presentation skills and communication skills.
- Independent, self-motivated, creative, and results oriented.
- Must be able to work under pressure and provide input in short project time lines.

JOB BENEFITS

Compensation includes industry competitive salary commensurate with experience, performance incentives, plus medical and dental benefits, 401(k), etc. Details available upon request.
